

The Greater Houston EMS Council

Presents this

Certificate of Recognition and Appreciation

to the organization and the individual members of

Montgomery County Hospital District EMS

as acknowledgment of their significant contribution to the nationwide relief effort during
the natural disaster otherwise known and designated as

Hurricane Katrina – 2005

Immediately following the landfall of Hurricane Katrina, the personnel of Montgomery County Hospital District EMS, without regard for their own comfort and/or security, responded outside of their community to the emergency needs of persons in areas most severely impacted in the Greater Southeast Texas Area to give aid and transportation to the sick and injured and to otherwise assist in mitigating this disaster of national proportion.

This service and these persons are hereby recognized by their fellow professionals for having brought honor and a greater dignity to the profession of Emergency Medical Services through their selfless and courageous actions during this time of greatest need.

In recognition thereof, the Greater Houston EMS Council conjointly affirms this heroic and honorable effort on this 17th day of May 2006, during National EMS Week.
