Trade-in of San Antonio box E-1960 (value is dependent upon Onan, A/C & Exterior Lights installed)	\$	-15,000.00
T	otal \$	137,350.00

Lerms and Conditions

- 1. This quote is valid for 90 days.
- 2 . All pricing is F.O.B. Houston.
- 3. Please make your purchase order out to Frazer, Ltd. (7219 Rampart Houston, TX 77081). Please email a copy of your purchase order and this quote to Adam Fischer at sales@frazerbilt.com.
- 4. Please note, payment for the entire purchase is due upon receipt and acceptance of completed unit.
- 5. To minimize delays, customer provided items should be present prior to unit production start.
- 6. Frazer will provide a weight slip with accompanying scale calibration certification. Your local vehicle registration office may require a state certified weight slip for registration. Should that be the case, you will need to weigh the vehicle at a local weigh station that provides a weight slip with the department of agriculture seal prior to registration.
- 7 . *Striping and lettering pricing may be adjusted based on the company's scheme. Striping and lettering pricing includes two hours' design time in the base price. Additional design time for more extensive graphics and/or multiple changes is quoted at \$100/hour.

Thank you for the opportunity to quote this job. If you have any questions please call me at 888-372-9371.

Job Order Contracting

Job Order Contracting (JOC)

Job Order Contracting (JOC) is used for additions and/or renovations to existing locations. • JOCs can either be managed or unmanaged. With an unmanaged JOC, the member would have • to negotiate the project and verify accurate pricing, as well as take on the sole responsibility of • the project from start to finish and beyond.

With a managed JOC, the projects would be monitored and reviewed to assure accurate pricing and quality workmanship. EPIC6 has partnered with Gordian. Gordian is the recognized leader in Job Order Contracting, completing hundreds of projects since 1990 based on JOC principles that company founder Harry H. Mellon created.

Gordian offers a managed JOC program. Gordian Job Order Contracting is a construction procurement methodology that prices virtually every construction task required for a job, inclusive of every hour of labor, every piece of material, and every piece of equipment. These prices are compiled in a Construction Task Catalog®. Facility owners know what their cost will be on the front end, without negotiation or surprises. Facility owners can access trusted, local contractors that have agreed to pricing through a competitively bid procurement process, and each job is overseen by a seasoned project manager. It is proven, legal and being utilized by hundreds of customers across the country.

- Owners utilize the JOC method for the following benefits:
 - Simplifies the procurement process for repair, alteration & minor new construction projects
 - Saves time Projects start in weeks rather than months
 - Saves money Eliminates or Lowers A/E Fee's & procurement/admin fees
 - Price Certainty and increased cost control
 - · Improves the quality of the work
 - Increases local subcontractor participation
 - · Virtually eliminates defaults, terminations and claims
 - Fully transparent process
 - Assistance with scope of work development
 - Assistance with progress of the project

Typical Project Criteria:

Over the competitive bidding threshold of \$50k Replacement in kind –Can be new construction: if Additions or Metal buildings

Types of Projects:

- Asbestos Removal
- Back-up Generator
- Bathroom Renovations
- Boiler Replacement
- Carpeting
- Concrete Sidewalks
- Demolish Buildings
- Doors and Hardware
- Engineered Metal Buildings
- Fire Sprinklers
- HVAC Upgrades
- Insulate Existing Buildings
- Masonry Repairs
- Office Renovations
- Painting
- Paving
- Replace Windows
- Roofing
- School Security

Federal Reserve Bank of Dallas

The Beige Book October 2017

Summary of Economic Activity

The Eleventh District economy continued to expand at a moderate pace over the past six weeks, and most contacts do not expect significant long-term disruption due to Hurricane Harvey. Manufacturing output strengthened, and activity in nonfinancial services increased. Retail sales growth continued to accelerate, with a surge in auto sales to replace vehicles damaged by the hurricane. Homes sales weakened during the reporting period and prices were flat. Growth in the financial services and energy sectors continued but at a slower pace, and crop conditions remained mostly favorable. Employment, wages and prices increased, particularly in manufacturing. Outlooks remained positive overall.

Employment and Wages

Overall employment rose, and upward wage pressure persisted. Hiring picked up in manufacturing, continued at about the same modest pace in services, and abated slightly in the energy sector. Reports of labor shortages persisted, spanning most industries. Some manufacturers said the difficulty finding workers was impeding their growth, and some services firms said it was driving up overtime costs. More than a quarter of firms expect that the impact of Hurricane Harvey will make finding and hiring workers more difficult over the next six months. In construction, builders were concerned that once posthurricane repair and rebuilding work begins, there likely will be skilled-worker shortages and increases in labor costs. Other contacts noted that they also pull from a labor pool that is likely to be in higher demand in the aftermath of the storm.

Prices

Selling prices increased at the same or faster pace over the past six weeks, and contacts noted upward pressure on input costs. Prices and costs rose at a faster clip in the manufacturing and energy sectors, while upward pressure was largely unchanged on the services side. New home prices were mostly flat, but there is continued pushback from buyers on pricing at the higher end. Some builders were offering discounts and/or incentives to entice buyers, particularly on inventory homes. Gasoline and diesel prices rose over the reporting period, as did oil prices.

Manufacturing

Robust expansion in the manufacturing sector continued, despite some disruption among Texas Gulf Coast producers in the wake of Hurricane Harvey. Output growth picked up further for durable goods in September, led by increases in computer and electronic product manufacturing. Fabricated metals production rebounded, and output among energy-related firms overall continued to exhibit strength. Meanwhile, nondurable goods production slowed. A majority of chemical producers noted production held steady or declined over the reporting period, with a number of executives saying Hurricane Harvey had a negative impact on logistics like transportation and availability of raw materials. Refinery capacity hampered by the storm was ramping back up quickly, with little damage to infrastructure. While it may take some time for supply chains to recover, the storm's impact on the refining and petrochemical industry are projected to be transitory. For Texas manufacturing overall, outlooks were positive and more optimistic than during the prior reporting period.

Retail Sales

Retail sales growth continued to accelerate despite Hurricane Harvey, according to firms surveyed three weeks after the storm. Nearly two-thirds of stores along the Texas Gulf Coast said they were negatively impacted by the hurricane, and on average those stores were shut down for about four days and experienced a reduction in revenue for about 10 days. Auto sales surged, partly due to increased demand for replacement vehicles after the storm. An auto dealer in Houston said sales were incredibly strong, noting that several hundred thousand vehicles had been flooded, and another dealer expects elevated demand to last about six months. For the broader retail sector in Houston, rebuilding efforts were fueling a rise in retail sales and demand for warehouses in the area from building supply companies. Outlooks for business in general were quite positive, an improvement from the mixed outlooks during the prior reporting period.

Nonfinancial Services

Demand for nonfinancial services continued to expand moderately over the past six weeks. There were some reports of Hurricane Harvey disrupting business, with those contacts noting the impact lasted one to two weeks on average. About a third of firms expect a net negative impact on revenues over the next six months from the storm, while nearly half expect no change on net and the balance anticipate an increase. Some staffing services contacts have seen a rise in demand for accounting and data entry positions related to the hurricane damages, as well as for call center employees and insurance adjusters. Staffing contacts generally think business activity will return to normal (pre-hurricane) by year's end, and an oil and gas staffing firm noted that "things are close to normal again" in Houston already.

Strength in the nonfinancial services sector was led by professional and technical services, with firms generally noting stronger revenue gains over the past six weeks, as well as transportation services. The healthcare industry remained rather weak, with contacts saying they were continuing to struggle with lower demand and rising costs. Leisure and hospitality also exhibited weakness over the past six weeks, particularly along the Gulf Coast and Mexican border.

Construction and Real Estate

Overall, home sales weakened during the reporting period. However, contacts in Austin and Dallas—Fort Worth (DFW) noted continued strength in sales of low- to mid-priced homes. In Houston, storm damage to single-

family homes was reported to be much more extensive compared with other property types. Contacts expect new home starts and closings in Houston to be behind schedule for the remainder of the year.

Apartment demand was generally disappointing in the third quarter, following a solid second quarter. Rent growth slowed and was below average in some large metros. In Houston, however, apartment leasing activity picked up, occupancy rose and rent concessions have diminished following Hurricane Harvey. The office market was generally characterized as solid in DFW and San Antonio, but still weak in Houston.

Financial Services

Loan demand continued to increase over the past six weeks, albeit at a more sluggish pace than during the prior period. Growth was led by commercial real estate loans, where volumes continued to rise at a moderate pace. Volume growth abated for commercial and industrial loans as well as for residential real estate loans, and consumer loan volumes declined slightly. Credit standards and terms tightened. Core deposit volumes grew again and net interest margins continued to increase. Outlooks in the financial sector remained optimistic.

Energy

Energy activity continued to expand, but at a slightly slower clip in the third quarter. Drilling activity in the Eagle Ford Shale and offshore has resumed normal operations after the hurricane. Overall growth in oil and gas production continued, but oilfield services firms noted weaker demand growth. Drilling activity is expected to decline slightly by the end of 2017, and demand for oilfield services is softening outside of the Permian Basin. However, six-month outlooks for 2018 were more optimistic relative to the last reporting period, and uncertainty has moderated.

Agriculture

Crop conditions remained favorable, although Hurricane Harvey hampered agriculture in the Coastal Plains. The extent of the impact is not yet known, but some livestock were lost and a small portion of the Texas cotton crop was damaged. Some rice and soybeans were also affected, but likely minimally. Overall, grain production was strong, with particularly robust yields in Northeast Texas. There is good moisture for planting winter wheat, but while wheat prices are higher than a year ago they are still generally below breakeven levels. Agricultural producers remain concerned about low crop prices, NAFTA negotiations, and the configuration of the next farm bill.
